

MANOHAR MEMORIAL P.G. COLLEGE, FATEHABAD

BEST PRACTICE-I

2017-18

Title of the Practice- Vocabooster-Vocabulary Extension Methods

The Context-

The institution caters to the need of student's coming from both local and rural areas. The students with their diverse background needed encouragement to learn English languages. The college recognized this need of students and decided to focus on the essential aspect. This aspect included not only the knowledge of the subjects, but also personality and soft skills.

Vocabulary knowledge is the single most important area of language competence and is of concern to all four languages skills. It was realized that the students will not be able to listen or speak confidently or read or write effectively if they do not have reasonable vocabulary competence. So, the department of commerce took initiative to develop vocabulary of the students and boost their morale.

The Objectives-

1. To inculcate reading habits amongst students.
2. To learn words that students use when they are talking about a particular subject.
3. To learn a list of words with their meanings, especially in a book for learning a foreign language.
4. To acquaint young students of the present generation with the words that they come across in their day to day life.

5. To assist students in acquiring employability assets which they can present to their employer.
6. To help students enhance their personality, infuse confidence and increase employability in any chosen career.
7. To learn words in context with the help of appropriate phrases.

The Practice-

The new and innovative practice initiated by the department of commerce decided to engage the students and those who are desirous to learn the effective use of language in a variety of social and professional situations. Words in isolation cannot be learned by picking words and their meanings from a dictionary. The only way to learn new words and improve vocabulary skills is by examining the use of words in their context and learning their uses. The words with the help of teachers are selected with an eye on the needs of their taking up various competitive and academic exams.

Evidence of Success-

Vocabulary building methods helped students develop their interest in reading newspapers and other competitive books regularly.

Problem Encountered-

The reading of English newspapers is not a habit with most of the students. Some students don't have even habit of using dictionary.

BEST PRACTICES-II

Title of Practice Minimizing Traffic & Environment clean or Pool day in a week.

To encourage the students Teaching Staff and Non-Teaching staff, once in a week i.e. Saturday for minimizing Traffic and make environment eco-friendly.

The Context

Traffic congestion is a major problem for transportation in India. The growth of increasing dependence on cars, bike is resulting in expensive road building and maintenance, logged and congested road, worsening air and noise pollution, traffic accidents and social inequities, that arise when the poor find transportation services increasingly unaffordable.

Objectives

- Regarding overall traffic congestion on roads
- Promoting alternative methods of transport
- Reduce number of vehicles on Road
- Reduce pollution and carbon dioxide emissions
- Reduce driving related stress for participants
- Provide social connections in society
- Reduce crashes for all modes.

The Practice

The College has started the new and innovative practice to environment, clean, on every Saturday in a week, In this practice, teaching, non-teaching staff and students, who

belongs to local areas, they come on foot, and who belongs to some far distance, they pool with someone or sharing this side with another person.

Reduce driving related stress for participants.

Provide social connections in society.

Reduce crashes for all modes

Evidence of success

Pool system reduces single individuals travelling cost, reduces full cost, reduces the number of vehicles on road, By use of walking, we can also maintain our health, i.e. beneficial for all. No. of crashes are reduced and social connections in society are increased and social connections are increasing this practice.

The most widely used mode of conveyance of public transport is 'buses'. Thus buses form a backbone of transportation system in India. In spite of this, it does not receive any preferential treatment in terms of traffic management, better maintenance of vehicles resulting in that common man who can afford even slightly is shifting from buses to their own vehicles. It may be two wheelers or four wheeler or even bicycles because of which the number of vehicles on roads are increasing which is leading to further lowering of speed, congestion, increase in pollution level etc.

Problems Encountered

Pool system is not suitable for everyone, because we can't always leave work, when we are ready to leave work. It requires everyone in the vehicles to be ready to leave at same time. These are still environmental consequences that may occur.
